Team Approach

Question 1: How well do the team members understand the problem?

The team was able to communicate effectively before beginning to create the project and solve the problems. We were able to solidify our understanding early on and thus able to complete the project in an efficient and effective manner.

Question 2: How are the project tasks achieved?

The team would work together on all tasks in order to have full collaboration from both members where possible.

Question 3: How did the team approach solving a problem?

The team worked together to solve the problem. If we were still stuck, the team asked the professor and the lab TA for any clarification.

Question 4: What approach was taken to solve the problem?

The team first brain stormed any solutions to the problem. We then decided to take the best approach to solving the problem from the ideas brainstormed. If that approach did not work, we tried another approach and so on.

Overall Comments on team approach: Our team approach was pivotal in the completion of our assignments. We would gather all necessary information and create an effective plan of execution. This allowed us to complete all tasks efficiently and with utmost quality. Both members contributed equally and therefore led to a successful team approach when completing tasks.

Team Coordination of Task Responsibilities

Question 1: How actively did team members take interest and support in terms of individual member responsibilities?

Both members showed genuine interest and support in the development of the project and completion of individual tasks. All individual responsibilities were finished with quality and delivered on time by both members.

Question 2: How well did the completion of tasks require active interchanges and sharing of information among members?

Almost all tasks required the collaboration of both members. Members would actively share information and expertise with each other to improve and ensure the quality of tasks being completed.

Question 3: How well did the assignment of tasks to individuals match their expertise?

Both team members had the expertise to complete tasks with quality and efficiency. However, members were able to and did get help from the other team members when necessary.

Question 4: How well did the team coordinate individual task assignments?

Both team members would go over the assignments and delegate the appropriate individual assignments to the member better suited to complete it. Both members would initially come up with the plan of completion of the assignment and then the member would execute the plan.

Overall Comments on team coordination of task responsibilities:

Overall, the team split up all the tasks fairly. The team members were also open for communication about any issue that would arise. No one in the team was given a task that they had no expertise in. This ensured that both team members were able to successfully complete the assignment.
